Cœur de métier

PHASE 1 Évaluation

Have the ability to know when you are doing thing in a good way or not. Accept the different critics of any other member of the team.

PHASE 1 Gestion de l'information

Every time that I search for new bibliography is possible to develop this competence: look at the new information trying to evaluate the veracity and fiability of the data that is presented.

PHASE 1 Expertise et méthodes

This is a competence that I practise every week when I have to present some results in the meetings of the laboratory, or maybe always not good results but problems that I need to solve so I present the possible alternatives or hypothesis that I could imagine for that. Normally I follow the new papers or new knowledges about my subjet of thesis. Nowadays, I could say that I know a lot different things about the sujet that I am working in. It is true that this year i have the challenge to adapt the possible explanation for my subject to a public not expertise in this field (high school children).

Qualités personnelles et relationnelles

PHASE 1 Communication

Know how communicate the progress in your different projects to the team.

PHASE 1 Analyse, synthèse et esprit critique

Know how summarise all the stuffs related to your project in order to present to your team. have a analytic and critical point of view always when you are in front of some new results or approaches in your work.

PHASE 1 Ouverture et créativité

Be creative and thinking in different ways to do some experiments, to do some changes in order to improve the results. Accept the different opinions or approaches of different people in the laboratory. It would enrich your point of view.

Gestion de l'activité

PHASE 1 Conduite de projet

et création de valeur

Have the responsibility of your part of project as a PhD student and to have the correct form to deal with the different problems of it.

PHASE 1 Gestion du changement

Accept that sometimes it is necessary to change the perfect plan that you have due to some changes of last minutes or some bad thing that you obtain in the experiments.

PHASE 1 Prise de décisions

Decide what is the best approach in order to get the results that you want with what one or more different approaches.

PHASE 1 Production de résultats

After thinking in the correct manner to do something, you have the results and it is the moment to present them to the different members of the team.
