

Mehdi Zallaghi**Computational scientist in engineering**

I am really passionate about mathematics and its real-world applications. Moreover, I am a motivated self-starter and analytical problem solver who views obstacles as challenges!

 mmzallaghi@gmail.com My webpage : mzallaghi4.github.io**Core business****PHASE 1 Skill development**

Developing data science skills involves a combination of theoretical knowledge and practical experience. - Learn the basics - Programming languages such as Python and R - Explore data with visualization tools and familiar with the data and identify patterns - Learn machine learning algorithms - Work on projects to practice skills - Collaborate and network

- *Sets his professional goals to be ambitious yet realistic.*
- *Identifies and develops means to enhance his employability throughout his career; manages his professional development.*
- *Broadens and upgrades his skillset, personal qualities and achievements.*
- *Uses his networks to expand his scope of competence.*
- *Knows how to transfer his expertise to other fields of activity.*
- *Realizes the necessarily international dimension of his career path.*
- *Accepts input from a mentor or coach to benefit his professional development.*
