Mehdi Zallaghi

Computational scientist in engineering

I am really passionate about mathematics and its real-world applications. Moreover, I am a motivated self-starter and analytical problem solver who views obstacles as challenges!

Core business

PHASE 1 **Skill development**

> Developing data science skills involves a combination of theoretical knowledge and practical experience. - Learn the basics - Programming languages such as Python and R - Explore data with visualization tools and familiar with the data and identify patterns - Learn machine learning algorithms - Work on projects to practice skills - Collaborate and network
